| 1 | Revit |
| 2 | Indoor mapping |
| 3 | X Reality |
| 4 | Gaming engines |
| 5 | Medical imaging |
| 6 | Machine learning |
| 7 | FME on mobile |

START

Average number of buildings constructed in urban areas daily (2018–2050)*

* All nonresidential and residential buildings (excl. single family homes) in urban areas

Source: STATISTA

Average number of buildings constructed in urban areas annually (2018–2050)*

1. One-step Revit integration (*beta*)

Direct Revit reading with no intermediate files

2. Getting your venue into indoor navigation apps

Indoor Mapping Challenges

- Must **integrate** multiple sources to produce an indoor map.
 - GeoJSON, Revit, IFC, CAD (Autodesk, Bentley), Civil 3D, Esri Geodatabase, databases, CityGML ...
- Must **transform** inconsistent data.
- Must **comply** with specifications of the indoor format, e.g. IMDF, HERE, ArcGIS Indoors, IndoorGML.
 - Strict data models and explicit spatial relationships.
- Venues constantly change, so maps need to be updated **automatically**.

Venues Using FME to Generate Indoor Maps

A stylized, futuristic cityscape at night. The buildings are rendered in glowing blue and purple outlines, with some windows showing small lights. The sky is dark with a few stars. The foreground features a grid of glowing purple lines on a dark surface, suggesting a virtual or augmented reality environment. The overall aesthetic is high-tech and digital.

3. Exploring your data in X Reality

Scenario: Augmented Wayfinding

1. Create floor network dataset.
2. Use the ShortestPathFinder.
3. Write to FMEAR format.
4. Make a webpage that opens the FME AR app.

Scenario: Augmented Objects

1. Create/load your floor plan.
2. Change existing objects, e.g. color or texture.
3. Add new objects, e.g. furniture, annotations, action heroes.

Scenario: Virtual Scenes

1. Read a 3D model.
2. Use the [ThreejsSceneCreator](#).
3. Write the scene and host it locally or on the web.
4. Put on your headset and explore!

Don't just *inspect* your data ...

The screenshot shows the FME Data Inspector interface. The main window displays a 3D model of a house. The interface includes a menu bar (File, View, Camera, Tools, Window, Help), a toolbar with various icons, and a Display Control panel on the left. The central view is titled 'View 1' and contains a 3D model of a house. The right panel shows a table of data for the 'Triangulator_TINSu...' object. The table has columns for 'Glob', 'Name', and 'Descri'. The first row is selected, and the table shows 14 rows of data. The status bar at the bottom indicates 'X: ----- Y: ----- IFC_COORDSYS_0 METER'.

Use the zoom out mode to control the camera

7. FME on Mobile

FME Data Express

Making it easy for anyone to run FME Workspaces as apps on their mobile device.

- Leverage device info like location and camera.
- Control permissions with tokens.

Example: Hydrant Collector App
